

Tan Yi Ya

Penang, Malaysia | tanyiya04@gmail.com | 018-3823002 | linkedin.com/in/tanyiya04

Summary

A Computer Science student specializing in Data Engineering. Passionate about exploring emerging technologies, staying updated with industry trends, and continuously expanding technical expertise. Strong interpersonal skills with a keen interest in networking and collaborating with likeminded personnel.

Education

Jit Sin High School SPM 2A+, 5A, 2A-, 1B+	2017- 2021
Penang Matriculation College (KMPP) Life Science, CGPA 4.00	2022 - 2023
University of Technology Malaysia (UTM) Bachelor Of Computer Science (Data Engineering) With Honours, CGPA 3.95	2023 - Present

Core Skills

Python, SQL, Alteryx, ETL/Data Engineering, Azure, AWS, Power BI, Git, Github, Docker

Certification

- MySQL Implementation Certified Associate
- MySQL 8.0 Database Developer Oracle Certified Professional
- Alteryx Designer Core Certification

Project

End-to-End Data Engineering Pipeline

- Developed a data pipeline using Apache Spark to process large CSV datasets and convert them into Parquet format for improved storage and query efficiency.
- Designed and implemented a Star Schema data warehouse to centralize analytical data.
- Deployed Metabase with Docker and built interactive dashboards for business intelligence and data exploration.

RA/MC Industry Case Study

- Contributed in a team to develop data-driven solutions for an industry-collaborated case study.
- Designed and developed Power BI dashboards to transform processed data into actionable insights.
- Participated in requirement discussions, troubleshooting and dashboard refinement to address project challenges and stakeholder needs.

Achievement

Microsoft ASEAN AI for Accessibility Hackathon 2024

Second Place

Project Title: Seeing AI Pro
